

MongoDB Assignment 2: project2.js) file that connects to MongoDB, creates the database, inserts all four collections, and displays the data.

```
const { MongoClient } = require("mongodb");

const url = "mongodb://127.0.0.1:27017";

const client = new MongoClient(url);

async function main() {

  try {

    await client.connect();

    console.log("Connected Successfully!");

    const db = client.db("company");

    // =====
    // Employee Collection
    // =====

    const employee = db.collection("employee");

    await employee.deleteMany({});

    await employee.insertMany([

      {

        emp_name: "harika",

        emp_age: 23,

        job_role: "seller",

        salary: 20000

      },

      {

        emp_name: "teja",

        emp_age: 18,

        job_role: "store assistant",

        salary: 10000

      },

      {

        emp_name: "megha",

        emp_age: 25,

        job_role: "senior cashier",

        salary: 45000

      }

    ])
```

```
    },  
    {
